

Project Title: Improving Seasonality and Diversity of Vegetable Production in
in Morne Prosper

Project Country: Commonwealth of Dominica

Responsible Organizations: Ministry of Agriculture and Fisheries

Proposed Budget (USD): JCCCP Grant Funding: \$94,838
In Kind Contributions: \$35,501.32
Total Budget: \$130,039.33

Project Objective

The overall aim of the project is to provide necessary training to farmers to incorporate adaptation measures against the threat of climate change, thereby developing a more resilient and climate smart crop production system by specifically focusing on organic practices.

Selected Focal Areas

This project will incorporate the following focal area identified under Outcome 2 of J-C CCP:

- Sustainable Agriculture

Targeted Stakeholder Groups

- Morne Prosper farming community which houses more than 100 farmers and 80% of vegetable production is carried out by female farmers

Project Activities

- Construction of shade house with rainwater harvesting system and drip irrigation system
- Construction of compost
- Construction of storm and counter drains and establishment of live windbreaks and live grass barriers
- Capacity building and training through farmer field school
