CCA finance under UNFCCC

- GEF Trust Fund (COP 1)
- Least Developed Countries Fund (COP 7)
- Special Climate Change Fund (COP 7)
- Adaptation Fund (COP 7; CMP.3)
- Green Climate Fund (COP 16)

GEF CCA at a glance

	LDCF	SCCF	SPA	Total
Pledges (\$m)	914	347	50	1,311
Contributions (\$m)	903	336	50	1,289
Approvals (\$m)	891	329	50	1,270
Co-financing (\$m)	3,730	2,376	609	6,715
Number of projects	215	73	26	314
Number of countries	51	79	53	128

LDCF/SCCF funding approvals in the region

	Number of projects approved	Total LDCF resources accessed (\$m)
Kiribati	2	8.30
Samoa	4	20.80
Solomon Islands	2	15.69
Tuvalu	3	9.05
Vanuatu	3	21.62
Total	14	75.46

In addition, the following countries have accessed \$14.82M in SCCF resources through the **PACC** project: Cook Islands, Federated States of Micronesia, Fiji, Marshall Islands, Nauru, Niue, Palau, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, Vanuatu

Accessing resources for NAPs

Developing countries may access LDCF/SCCF resources in support of the preparation of their NAP processes:

- consistent with the **objectives** and **principles** laid out in 5/CP.17 and GEF/LDCF.SCCF.14/06;
- within the **scope** defined by the initial guidelines:
 - (i) laying the groundwork and addressing gaps
 - (ii) preparatory elements
 - (iii) implementation strategies
 - (iv) monitoring, reporting and review
- **through existing GEF modalities:** medium-sized projects, full-sized projects and programmatic approaches

Global support programs

- *Assisting Least Developed Countries with country-driven processes to advance National Adaptation Plans (\$2.19M from LDCF, approved in May 2013)*
- *Assisting non-LDC Developing Countries with Country-driven Processes to Advance National Adaptation Plans (\$5.09M from SCCF, approved in March 2014)*
- *Expanding the Ongoing Support to Least Developed Countries with Country-driven Processes to Advance National Adaptation Plans (\$6.95M from LDCF)*

Support provided through national and regional projects

“(a) to **reduce vulnerability** to the impacts of climate change, by building adaptive capacity and resilience; [and]

(b) to facilitate the **integration of climate change adaptation**, in a coherent manner, into relevant new and existing policies, programmes and activities, in particular development planning processes and strategies, within all relevant sectors and at different levels, as appropriate” (decision 5/CP.17).

Indicator	Value	Number of projects	Number of countries
Objective 1: Reduce the vulnerability of people, livelihoods, physical assets and natural systems to the adverse effects of climate change			
Number of direct beneficiaries	12,354,562	113	78
Hectares of land better managed to withstand the effects of climate change	4,181,035	61	49
Objective 2: Strengthen institutional and technical capacities for effective climate change adaptation			
Number of projects that expand access to improved climate information services	76		60
Number of projects that expand access to improved, climate-related early-warning information	44		37
Number of people trained to identify, prioritize, implement, monitor and evaluate adaptation strategies and measures	496,681	85	68
Number of regional, national and sub-national institutions with strengthened capacities	429	74	55
Objective 3: Integrate climate change adaptation into relevant policies, plans and associated processes			
Number of regional, national and sector-wide policies, plans and processes developed and strengthened	219	70	62
Number of sub-national plans and processes developed and strengthened	985	71	59

Samoa: Economy-wide Integration of CCA and DRM/DRR to Reduce Climate Vulnerability of Communities

UNDP, \$13.65M from the LDCF, approved in July 2013

- **stocktaking** of all current and planned climate change adaptation projects, plans, reports and assessments;
- establishing a national **climate and disaster risk database** that is centralized and accessible to all Ministries;
- **integrating medium and long-term climate change risks** and opportunities into sector plans; and
- developing concrete **recommendations to align the next Strategy for the Development of Samoa (2017-2021) with the draft National Climate Change Adaptation Strategy** and recommendations for sector plans

Antigua and Barbuda: Building climate resilience through innovative financing mechanisms for climate change adaptation

UNEP, \$5.58 million from the SCCF, approved in Nov 2013

- **Policy briefs and technical guidelines** developed for policy makers on adaptation – including cost-effective adaptation interventions focused on ecosystems – funded by innovative financing mechanisms.
- **Existing policies and plans revised** to promote and facilitate adaptation to climate change by using innovative financing mechanisms

LDCF/SCCF: opportunities to advance NAPs

- (i) Projects under **early stages of implementation or different stages of preparation** – could these projects contribute towards the NAP process?
- (ii) Project and program concepts for **NAPA implementation** – do these present opportunities for advancing the NAP process?
- (iii) Addressing priority needs through **projects and programs dedicated to the preparation of the NAP process** – flexibility to with regard to scope, focus and duration

GCF: emerging opportunities

“All developing country parties are eligible to receive resources from the Fund. [...]

*The Fund will support developing countries in pursuing project and programmatic approaches **in accordance with climate change strategies and plans**, such as low-emission development strategies or plans, [NAMAs], [NAPAs], [NAPs] and other related activities.” (Governing Instrument, paras 35-36)*

All eligible countries may request **readiness** support for, *inter alia*, NDAs or focal points to engage with in-country stakeholders; strategic frameworks for engagement with GCF; to meet accreditation standards of the GCF; the development of initial pipelines of programs and projects.

Thank you
