COP decisions on NAPs

Decision 1/CP.16

Establishment of the process to formulate and implement NAPS

Decision 12/CP.18

- GEF to support LDCs through the LDCF for activities to enable NAPs
- GEF to consider how to support non-LDCs through the SCCF
- To take stock of progress at COP20

Decision 3/CP.20

- Communication of NAP documents and outputs through NAP Central
- AC & LEG in collaboration with GCF to consider how to best support developing countries in accessing the GCF for NAPs

Decision 6/CP.22

- Appreciates progress (by Parties, GCF, GEF) and notes challenges (NAP proposals waiting for funds from LDCF)
- Invitation to Parties to access the USD 3 million allocation for NAPs by GCF
- LEG & AC to continue engagement with the GCF

2010 2011 2012 2013 2014 2015 2016

Decision 5/CP.17

- Objectives
- Guiding principles
- Guidelines
- Support (technical, financial)

Decision 3/CP.17

 Includes mandates relating to GCF support for NAPs

Decision 18/CP.19

UN, specialized, bilateral and multilateral agencies to consider establishing or enhancing support programmes for non-LDCs

Decision 1/CP.21

GCF to expedite support for LDCs and other dev. countries for formulation of NAPs, and subsequent implementation

Decision 19/CP.21

LEG to provide technical guidance and advice on accessing the GCF for NAPs

Decision 4/CP.21

LEG & AC to consider how to provide more info. for accessing the GCF for NAPs

Evolving guidance on national adaptation plans

- ☐ Since establishment (in 2010), the LEG continues to explore with partner agencies, how to refine the technical guidelines through supplements, the integrating framework, etc.
 - ❖ Includes guidance on how to integrate SDGs into NAPs, as well as Sendai and other international, regional and national frameworks
 - ❖ M&E of the process using the PEG M&E Tool
 - Work on adaptation solutions for main systems
 - . Etc.

National adaptation plans

■ NAPs are the main vehicle for undertaking adaptation from 2010 onwards ☐ They provide a means to scale up adaptation to the national level, with flexibility for countries to follow a country-driven road map to arriving at the NAP, including on whether they start with an integrated approach then sectors, or sectors then an integrated approach ☐ The NAP is the primary instrument help countries manage their work on adaptation, at all scales and levels into a coherent national approach. ☐ Designed to be a long-term approach that produces plans regularly, and get implemented, monitored, revised, scaled out to more sectors over time

Next steps

- Implementation
- Need for learning from various events, to find a way to capture this learning and inform design of new adaptation solutions:
 - The recent major storms/flooding in Bangladesh, Nepal, Mumbai, Caribbean, USA, etc.;
 - Flooding in many coastal cities (Manila, Nadi etc.)
- □ Reporting SBI, COP, PA
