

# ARE YOU SEEING THE CLIMATE, CHANGE

There is a reason why  
our coral reefs are  
looking less colourful.

That reason is climate change. Rising sea temperatures are killing our coral reefs. We have to act now if we want to preserve the beautiful reefs that Belize is known for. Visit [www.adaptation-undp.org](http://www.adaptation-undp.org) for more information on how you can stand up to climate change.
