

# ARE YOU SEEING THE CLIMATE, CHANGE

There is a reason why  
there is more flooding  
and hurricanes are  
more intense.

The reason is climate change. Connect the dots – Climate change means more unpredictable weather patterns and natural disasters. We have to act now if we want to preserve our country. Visit [www.adaptation-undp.org](http://www.adaptation-undp.org) for more information on how you can stand up to climate change.
